

Pepper - Hot

Habanero - Lightning

The Lightning Habanero Peach is a very unique long and thin zig-zagged shaped peach colored Habanero. It has a thin flesh like other habaneros and not quite as hot as your typical hab ringing in around 200-250k shu's. The flavor is sweet and fruity. The plants tend to grow closer to the ground and are very bushing producing tons of peppers. They grow best by supporting them with a cage.
