

Pepper - Hot**Pink Tiger**

The Pink Tiger is one of the most stunning chili peppers you can grow. A cross between the Bhut Jolokia and Pimenta da Neyde, it was developed in Italy and showcases striking colors. These 2-3 inch peppers start green and dark purple, ripening to creamy pink hues with striations and, at times, vibrant striping, influenced by growing conditions. The plant itself is a beauty, with dark green and purple foliage, reaching heights of 3-4 feet and producing abundantly. The peppers pack a hot, fruity punch, making them as flavorful as they are eye-catching. 200k SHU's
