

**Pepper - Hot**

**Reaper Leopard Gold**

While it lacks many traditional Reaper traits, it retains the distinctive Pimenta Leopard shape with a brilliant golden iridescence. The lantern-shaped pods grow up to 2 inches long, and the dark-foliage plants remain compact, growing close to the ground. Expect notable heat, but nothing overwhelming—making it perfect for those who appreciate a bold yet balanced burn with exceptional aesthetics! 500k-1000k SHU's
